VISION

To be a centre of excellence in Computer Science and Engineering education, focus on research, innovation and entrepreneurial skill development with professional competency.

MISSION

- M1 : To provide state of the art ICT infrastructure and innovative, research oriented teaching learning environment and motivation for self-learning & problem solving abilities by recruiting committed faculty.
- M2 : To encourage Industry Institute Interaction & multi-disciplinary approach for problem solving and adapt to ever changing global IT trends.

HOD'S DESK

The service of Computer Science engineers is inevitable in all fields in the modern race. The Department of CSE has recorded consistent improvement in its academic, research and placement performance. It offers a range of innovatively designed programs whose curricula are constantly updated to meet the changing requirement of the industry and also to meet the needs of major stakeholders.

You cannot escape the responsibility of tomorrow by evading it today.

TCS TECH BYTES

19-09-2015

Tata Consultancy Services is an information technology consultancy company that is reputed internationally is our home country company. JIT was esteemed with pride when TCS organized a quiz contest dubbed 'TCS Tech Bytes' right here in our campus. The quiz focussed on the skills of programming, aptitude and general knowledge of the current trends in the industry. There were many rounds and the crowds filled exceeding expectations. The second round was held in Mysore and many represented the event held there from JIT. This event put a smile that reverberated among all because its challenging stature and stern principle of bringing every participant up to the track with the current trending accounts of the Industry.

Every once in a while, applying theoretical concepts into practice enhances the insight into knowledge that deepens learning through hands-on session. The tool that was taught and demonstrated and taught was Wireshark. Many fun and conceptual concepts like packet sniffing and packet capturing were clearly and easily demonstrated and coached. There was also dissection of packets and its analysis also exhibited. Moreover, the various layers of network were perfectly portrayed. The session was conducted in the seminar hall to accommodate as many learners and also was platform friendly.

CSI Foundation Day : Mock Interview

04-03-2017

Dressing up the students for industry preparedness is in the blood of every JIT-ian. To debunk this sentiment, we organised an event under the banner of CSI for the perks of the pre-final year students in 2017. The participants were asked to prep up their CVs, and the best CV was given an award. The judges were none other than the alumni students of JIT. There was an aptitude quiz too that was conducted fabricating every brain that participated toward more logical cogitative. The event involved various rounds and was very well organised with one-to-one interviews held across various classrooms and also accompanying several GD rounds as well.

Small deeds done are better than great deeds planned.
